Election/Restrictions

1. The reply filed on 4 January 2006 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): response to election of species requirement was "incomplete". See 37 CFR 1.111. Specifically, Applicant elected a species group instead of a species from each of the groups specified; this was apparently due to an innocent misunderstanding of election of species where multiple groups are specified. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

2. The Examiner repeats the earlier election of species requirement with emphasis placed where the Examiner feels would be helpful to Applicant.

This application contains claims directed to groups of patentably distinct species of the claimed invention.

Species Group I: capping fluids.

Species Group II: corrosion inhibitors.

Species Group III: scale inhibitors.

Species Group IV: salt inhibitors.

Species Group V: oxygen scavengers.

Species Group VI: de/non-emulsifiers.

Species Group VII: biocides.

Applicant is required under 35 U.S.C. 121 to elect **a single disclosed** species for **each of the seven groups** given above for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a **listing** of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered **nonresponsive** unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or **admission** may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. In response to the restriction requirement as to claim groups in the previous Office Action, Applicant has elected the claims of group I (claims 1-41) with traverse.

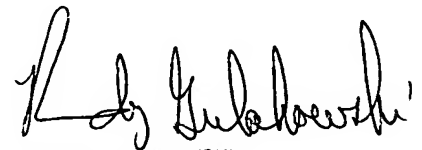

The Examiner has considered Applicant's arguments offered to traverse this requirement and has found them unpersuasive. Sufficient reasons were given for the restriction in the previous action, and Applicant's arguments do not overcome them. The requirement is maintained and examination will proceed on the claim of group I as elected; examination is postponed until Applicant responds to the species election requirement reasserted in the present action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. R. Richard whose telephone number is 571-272-8502. The examiner can normally be reached on M-Th, 8am-6pm and alternate Fridays, 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
